"Are You the Cause or The Result?" saved my life. I listened to it 287 times. It got me to be self-responsible for creating my bankruptcy, which was my best worst experience. Then I wrote Cavett Robert a letter and he hand-wrote me back. He said that I should come to the National Speakers Association. I did, and it changed my life. He was very kind and encouraging and told me that I had a big career ahead of me. He let me pick him up from the airport in my beat-up Volkswagen and showed me how to treat everyone. He was THE top human-engineer in the world and I just loved and adored the genius that still lives in my mind and heart as Cavett Robert."
